

Multiport Max-20

Cellular, WiMax, & Backhaul Surge Suppression Solutions

FEATURES

- Innovative modular design allows for custom protection configurations
- Interchangeable modules available for:
 - T1/E1
 - DS3
 - 10/100/1000BaseT (GigE) Ethernet
 - Power over Ethernet (PoE)
- Modules can be removed, replaced, and/or upgraded independently
- Aluminum suppressor chassis mounts two units high in a standard 19" equipment rack
- Optional wall mount configuration available
- Double lug grounding

ACData's innovative Multiport Max-20 was custom-designed to provide a versatile, modular surge protection solution for the evolving 3G, 4G, WiMax, WiFi, and Backhaul environments. With 20 available ports and protection modules for T1/E1, DS3, 10/100/1000BaseT (GigE) Ethernet, and Power over Ethernet (PoE), the configuration options are endless, allowing for truly custom protection solutions.

The Multiport Max-20 provides 20 protection ports and can be custom configured to meet site-specific protection requirements.
